1588 W. North Temple
Salt Lake City, Utah 84116

Attention: Ron Daniels

Gentlemen:

I understand that Mark Welch of Ranchers Exploration and Development Corporation had a conversation with you recently and discussed relocation of the waste rock stockpile at the Escalante Mine. The reason for moving from our tentative location is the topography is much too steep to be practical. By moving the stockpile, the area of surface covered will be less because there will be a flat base. I have enclosed a map of the revised location for your information.

Mark also mentioned that your office will send an archaeologist to the mine site to inspect the area and let us know his findings. Thank you for your time and consideration.

Sincerely,

Bruce R. McGovern
